

DATA SHEET

vibro-meter®

CE134 piezoelectric accelerometer

KEY FEATURES AND BENEFITS

- From the vibro-meter® product line
- Sensitivity: 5 µA/g
- Frequency response: 5 to 10000 Hz
- Temperature range: -55 to 350°C
- Long-distance signal transmission
- Integrally attached electronics
- Operation over a wide temperature range
- Integral case insulation
- Certified for use in potentially explosive atmospheres
- Available in low-frequency and high-frequency versions

APPLICATIONS

- Vibration monitoring of turbines, turbo compressors and other industrial machinery
- Suitable for harsh industrial environments and/or hazardous areas

DESCRIPTION

The CE134 piezoelectric accelerometer from Meggitt's vibro-meter® product line is a vibration sensor designed for the monitoring and protection of machinery in harsh industrial environments and/or hazardous areas.

The CE134 sensor features a centre-mounted symmetrical compression-mode measuring element using ceramic material. The sensor uses integrally attached electronics to provide the required signal processing, eliminating the requirement for an external signal conditioner (charge amplifier). The attached electronics (temperature zone C) also performs charge-to-current conversion in order to provide a current-modulated output signal that is suitable for transmission over long distances. Importantly, this eliminates the need for connectors capable of withstanding the higher temperatures closer to the machinery (temperature zones A and B).

The sensor head is connected to the attached electronics by an integral cable (soft-line, low-noise, shielded) in a hermetically sealed link, protected by a flexible, leak-tight protection tube (stainless-steel hose). More specifically, the sensor head, protection tube and electronics housing

DESCRIPTION (continued)

are hermetically welded to one another, resulting in a system that is fully protected against cooling fluids, lubricants, water, steam and other potential contaminants.

The CE134 sensor and electronics are insulated from their housings (integral case insulation) and have a sensitivity of 5 $\mu\text{A/g}$. The CE134 is available in low-frequency (LF) or high-frequency (HF) versions, with either a bayonet or a threaded connector fitted to the integrally attached

electronics housing. All versions are Ex certified for installation in hazardous areas. See **Ordering information on page 8**.

The CE134 piezoelectric accelerometer is an extremely reliable device that is suitable for the long-term monitoring of vibration in many industrial applications.

For specific applications, contact your local Meggitt representative.

SPECIFICATIONS

General

Input power requirements	: 15 to 28 V _{DC} , with a bias (standby) current of 5 to 8 mA
Signal transmission	: Current-modulated output (2-wire system)
Signal processing	
• Internal	: Integrally attached electronics (charge-to-current conversion)
• External	: Galvanic separation unit and/or monitoring system electronics

Operating

(At 23°C \pm 5°C, 73°F \pm 9°F)

Sensitivity (at 120 Hz)	: 5 $\mu\text{A/g}$ \pm 5%
Dynamic measurement range (random)	: 0.001 to 400 g PEAK. Note: The sensor resonance effect is corrected by a filter.
Overload capacity (spikes)	: Up to 1 000 g PEAK (random vibration)
Linearity	: \leq 1% over dynamic measurement range
Transverse sensitivity (measured with 5 g at 15 Hz)	: \leq 5%
Resonant frequency (mounted)	: 23 kHz typ.
Frequency response	
• Low-frequency (LF) version	: -3 dB at 5 Hz. \pm 5% from 10 to 500 Hz (with typical deviations of -10% at 1 000 Hz and -30% at 2 000 Hz).
• High-frequency (HF) version	: -3 dB at 5 Hz. \pm 5% from 10 to 5 000 Hz. \pm 10% from 5 000 to 10 000 Hz.

Environmental

Temperature range	
• Sensor head	: -55 to 350°C (-67 to 662°F), temperature zone A
• Cable/flexible stainless-steel hose (protection tube)	: -55 to 260°C (-67 to 500°F), temperature zone B
• Attached electronics (signal conditioner)	: -40 to 125°C (-40 to 257°F) for continuous operation and -55 to 130°C (-67 to 266°F) for short-term survival, temperature zone C.

SPECIFICATIONS *(continued)*

Temperature sensitivity error with respect to 23°C (73°F) : $\pm 5\%$ from -55 to 350°C (-67 to 662°F) for the sensor only (with the cable/flexible stainless-steel hose and attached electronics at constant temperatures)

Shock acceleration

- Sensor head : ≤ 2000 g PEAK (half sine-wave, 1 ms duration)
- Attached electronics (signal conditioner) : ≤ 500 g PEAK (half sine-wave, 1 ms duration)

Corrosion, humidity

- Sensor head : INCONEL[®] alloy 600, hermetically welded
- Flexible stainless-steel hose (protection tube) : Stainless steel (1.4541), hermetically welded
- Attached electronics : Stainless steel (1.4441), hermetically welded

Note: The sensor head, protection tube and electronics housing are hermetically welded to one another to create a leak-tight assembly that is impervious to 100% relative humidity, water, steam or oil, sea-salt atmospheres and other potential contaminants such as dust, fungus and sand.

Base strain sensitivity : $\leq 10^{-4}$ g/ $\mu\epsilon$

SPECIFICATIONS *(continued)*

Potentially explosive atmospheres

Available in Ex approved versions for use in hazardous areas

SPECIFICATIONS *(continued)*

Approvals

Conformity	: European Union (EU) declaration of conformity (CE marking). United Kingdom (UKCA) declaration of conformity. EAC marking, Eurasian Customs Union (EACU) certificate/ declaration of conformity.
Electromagnetic compatibility	: EN 61000-6-2:2005. EN 61000-6-4:2007 + A1:2011.
Electrical safety	: EN 61010-1:2010
Environmental management	: RoHS compliant (2011/65/EU)
Hazardous areas	: Ex approved versions (see Potentially explosive atmospheres on page 4)
Russian federal agency for technical regulation and metrology (Rosstandart)	: Pattern approval certificate OC.C.28.004.A N° 59463

Calibration

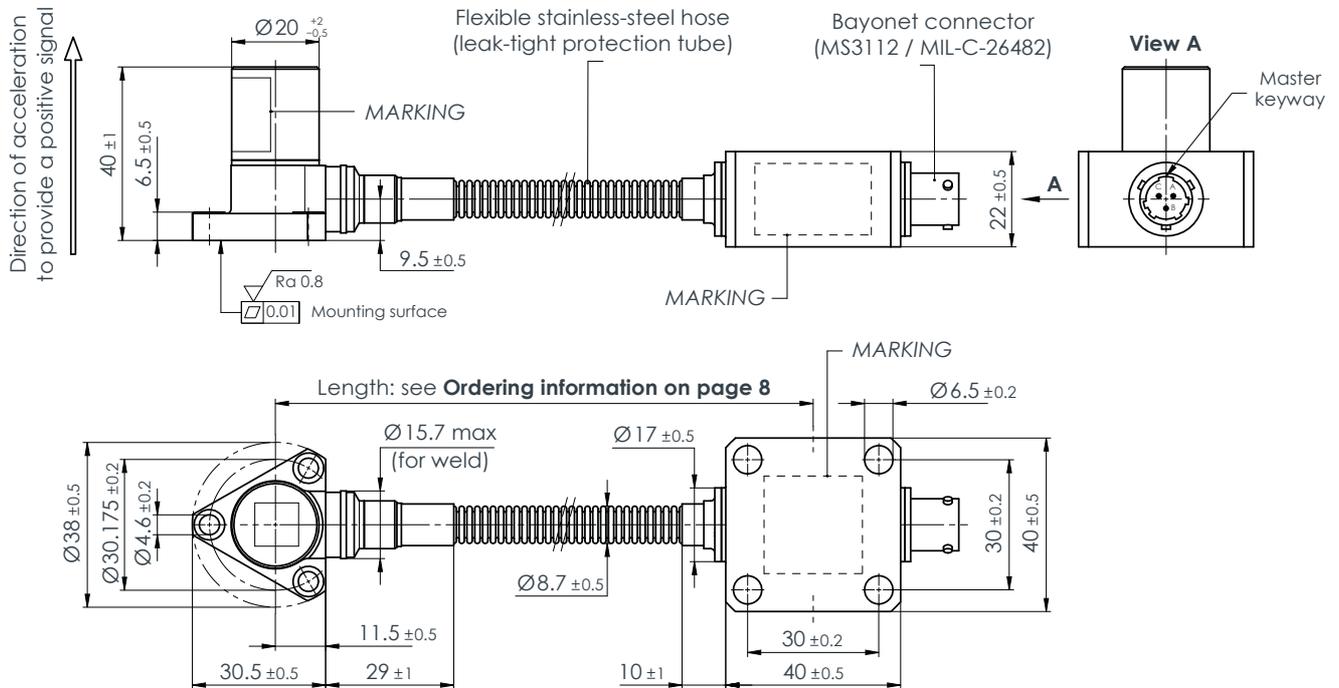

Dynamic calibration at factory at 120 Hz and 5 g PEAK (23°C, 73°F). No subsequent calibration necessary.

Mechanical

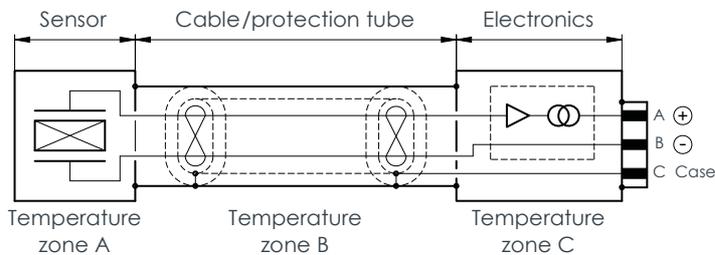

Dimensions	: See Mechanical drawings starting on page 6
Connection	
• Bayonet connector	: Three-contact, circular, stainless-steel connector with bayonet coupling (based on MS3112 / MIL-C-26482). Mates with a CG134 bayonet connector (such as MS3112E08-3S).
• Threaded connector	: Three-contact, circular, stainless-steel connector with threaded coupling (based on EN2997 / MIL-C-83723). Mates with a CG134 threaded connector (such as MIL-C-83723).
Weight	
• Sensor head	: 110 g (0.24 lb) approx.
• Cable/flexible stainless-steel hose (protection tube)	: 135 g/m (0.091 lb/ft) approx.
• Attached electronics (signal conditioner)	: 200 g (0.44 lb) approx.
Mounting	
• Sensor head	: Three M4 × 16 Allen bolts (hexagonal socket head) with three M4 spring-lock washers. Mounting torque of 4.5 N•m (3.3 lb-ft).
• Attached electronics	: Four M6 × 35 Allen bolts (hexagonal socket head) with four M6 spring-lock washers. Mounting torque of 15 N•m (11.1 lb-ft).
	Note: See the Mounting adaptors in Accessories on page 8 and refer also to the <i>Vibration measurement chains using CExxx or PVxxx sensors installation manual</i> .

MECHANICAL DRAWINGS

CE134 with bayonet connector

Wiring diagram

Temperature zones
 Zone A: -55 to 350°C (-67 to 662°F)
 Zone B: -55 to 260°C (-67 to 500°F)
 Zone C: -40 to 125°C (-40 to 257°F)

Notes

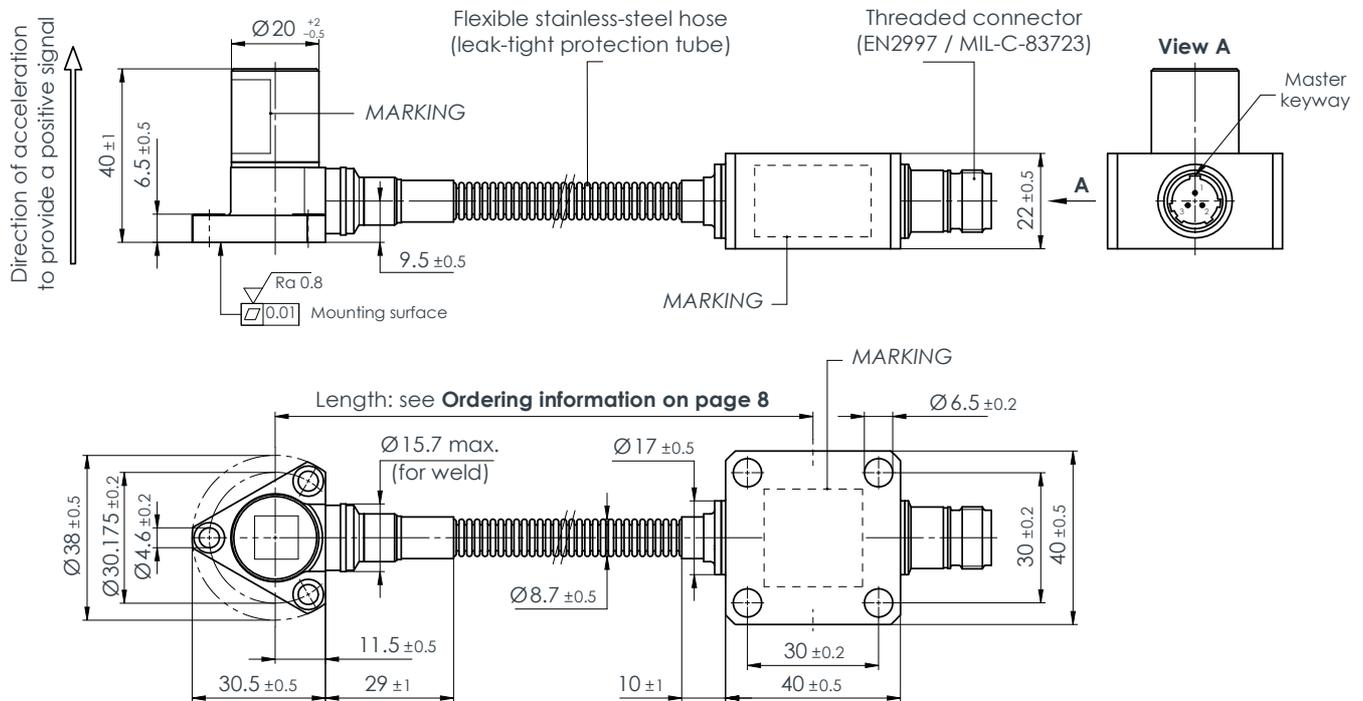

All dimensions in mm (in) unless otherwise stated.

The CE134 with the bayonet connector and the CE134 with the threaded connector are identical except for the type of connector fitted to the integrally attached electronics housing.

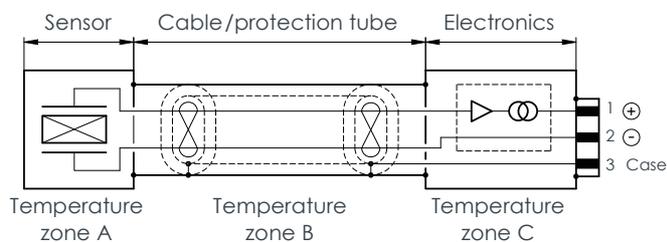

Pins B and C of the bayonet connector must be connected together externally.

Meggitt (Meggitt PLC) is a leading international engineering company, headquartered in England, that designs and delivers high-performance components and subsystems for aerospace, defence and selected energy markets. Meggitt comprises four customer-aligned divisions: Airframe Systems, Engine Systems, Energy & Equipment and Services & Support.

The Energy & Equipment division includes the Energy Sensing and Controls product group that specialises in sensing and monitoring solutions for a broad range of energy infrastructure, and control valves for industrial gas turbines, primarily for the Power Generation, Oil & Gas and Services markets. Energy & Equipment is headquartered in Switzerland (Meggitt SA) and incorporates the vibro-meter[®] product line, which has over 65 years of sensor and systems expertise and is trusted by original equipment manufacturers (OEMs) globally.

All information in this document, such as descriptions, specifications, drawings, recommendations and other statements, is believed to be reliable and is stated in good faith as being approximately correct, but is not binding on Meggitt (Meggitt SA) unless expressly agreed in writing.
